Five Senses by CSI Wall Panels is an innovative architectural panel system that combines precision fit wall panels into a flexible, modular designed framing attachment system. Constructed using a variety of substrate materials and an extensive array of architectural finishes, our modular system allows you to work in flexible design and functional combinations of the lower and upper portion of the wall. While our system can incorporate typical 4’ x 8’ panels, it was designed to offer a more flexible installation of 4’ x 3’ panels for the lower wainscot and 4’ x 5’ panels for the upper wall.

While the system brings one value to the product, the other value is found in the extensive depth and form that each design achieves through the magnificent 3D carvings and endless finishes. Make selections based on your specific decor; wood grain, fantastic stone carved options, contemporary metal finishes or bring new language to your environment by choosing one of our pre-designed themes. Combine leather and fabric for a fantastic retro look, or concrete finishes with old brick application for Loft decor. The opportunities and combinations are endless. Help us satisfy your vision and create your character.
**FEATURES**

**Bespoke Panels**
Bespoke precision fit wall panels, framing attachment system, moldings, reveals, and trims.

**Modular Designs**
Flexible, modular designs offering an unlimited range of panel sizes, materials, finishes, patterns, colors and moldings.

**Durable Designs**
Includes wall panels resistant to chemicals, stains, water, fire retardant, abrasion resistant and more.

**Functional Designs**
Practical uses with tackable surfaces, chalkboards, whiteboards and magnetic solutions.

**Sustainable Designs**
Sustainable designs that do not pollute the environment and are non-toxic.

**Renewable Designs**
Renewable designs that utilize components made from recycled raw materials.

**Certified Designs**
Certified designs according to FSC®, LEED®, Greenguard and more.

**Suitable for New Construction or Reno**
Perfect for any surface including CMU cinder block, finished drywall, tile, wall coverings, plaster, and other dated surfaces.

**No Demolition Required**
Resulting in elimination of debris, dust, contaminants as well as cost savings from the elimination of disposal costs and clean-up.

**Fast Installation**
Labor cost savings.
